SSO Link Set Up Guide

Step One:
Send your metadata (URL link preferred).
Email to mblair@3rdmil.com
We will import your metadata in order to generate your campus-specific metadata link.

Step Two:
We will send back your custom 3rd Millennium metadata link in the following format:
https://sso.3rdmil.com/realms/students/broker/University%20Example/endpoint/descriptor

We will also provide one of the following types of links for you to test prior to your launch date.

Option 1 - SSO Link = Student Login (Preferred)
This SSO student login link will follow this format with the addition of your campus-specific identifier (GUID) at the end of the link similar to this:
account.3rdmil.com/sso?id=XXXXX

Option 2 - SSO Link = Course Enrollment + Student Login
If your campus administrator has opted for the feature that the SSO link will also generate the student enrollment as well as be used as the login link, your SSO link will include a suffix that enrolls users in their course(s). The link will look similar to this:
account.3rdmil.com/sso?id=123GUID4567&Control_Number=XXXXX

NOTE:
If troubleshooting is necessary, please send any available SAML logs, network activity logs, or error message screenshots to mblair@3rdmil.com . We will investigate the issue and ask you to retest.
If permitted, please provide our development team with a test user during the troubleshooting phase will speed any error resolution process along significantly.
